The final step in the waste picker integration process is to revise the WPIP based on lessons learned and new issues and opportunities that have emerged.
QUESTIONS FOR THE WORKING GROUP (OR WASTE PICKER INTEGRATION COMMITTEE IF IT HAS BEEN ESTABLISHED)
The Working Group or Committee should discuss and agree:
• What lessons can be drawn from the monitoring and evaluation reports?
• How has the context changed?
• What new needs have emerged?
• What new knowledge and skills have been developed?
• How can we strengthen existing programmes?
• Which programmes should be suspended?
• What are the key priorities?
• What new programmes should be put in place?
• How must the budget be revised?

The WPIP must be formally revised and any other plans or programmes that are impacted by the changes must be aligned with the changes.

What to include in the updated WPIP

• Lessons drawn from monitoring and evaluation
• New needs and contexts.
• New knowledge and information
• Updating programmes: which should be extended, suspended?
• Updating priorities
• Updating budgets

How to institutionalize the updated WPIP
• Formally revise the WPIP
• Align any other plans or programmes that are impacted by the changes.
• Include revised actions, target and budgets in relevant plans and KPIs.
• Adopt revised WPIP
• Re-align budgets

Tool 10: Revise the WPIP provides checklists you can use to guide you in this process.
LET’S TALK ABOUT YOUR CONTEXT:
What processes need to be followed to formally adopt the revised or new WPIP?

Which policy and planning documents must be revised to include new commitments and targets?
